Technical Service

Chattanooga Sewing and Sales Company, Inc. was founded in 1959 by Kendrick B. Hudson. Starting as a small sewing business making flour and dye bags, we have grown steadily over the years as more and more customers have experienced the superior service and quality that back up every **CS&S** product.

Today, **CS&S** is a leader in the manufacturing of filtration products. We manufacture all OEM filter bags or cloths in any woven or needledfelt fabric that is used in wet or dry filtration. Purchase exactly what you need because we knit our own fabrics in a wide variety of yarns and fibers used in wet and dry filtration. We eliminate the middleman—saving you time and money by offering filter bags and cloth

directly. Responding quickly to you is so important that we have an emergency delivery service. As members of the Air Pollution Control Association and the American Filtration Society, you can be assured that your filtration problems are in the hands of experts who will do whatever it takes to keep your plant up and running, with little or no downtime.

In addition to our fabric filters, we supply parts and accessories for all OEM equipment, including cages, valves, timer panels and sonic horns. Dedication to innovation and quality is what makes **CS&S** a leader in the filtration industry. Large enough to provide quality products, yet small enough to know you and your businesses—that's CS&S Filtration.
